SUMMARY:

Department of English organized workshop for the UG Students on the Topic **"ASPECTS OF ORAL AND INTERPERSONAL COMMUNICATION SKILLS"** from **06.02.2023-8.02.2023.** Mastering oral and interpersonal communication encompasses various essential aspects, leading to significant outcomes. Verbal communication involves speaking clearly, using appropriate vocabulary, and constructing grammatically correct sentences. Non-verbal communication, including body language, eye contact, and understanding personal space, complements verbal messages. Active listening, providing thoughtful feedback, and demonstrating empathy are crucial for effective interpersonal interactions. Additionally, presenting information in an organized and engaging manner, often with the aid of visual tools, enhances clarity and retention. Cultural competence, involving the recognition and respect of diverse communication styles, ensures adaptability in various contexts. Desired outcomes of mastering these skills include enhanced understanding and clarity, improved personal and professional relationships, increased confidence in public speaking, effective conflict management, and the ability to communicate respectfully in diverse cultural settings. These skills collectively foster better leadership, collaboration, and harmonious interactions.

Learning Outcome: Students were able to

- Articulate their thoughts clearly and effectively, using appropriate vocabulary and grammar, resulting in improved mutual understanding and reduced miscommunication.
- Demonstrate strong active listening skills, empathetic responses, and respectful communication, leading to stronger relationships.
- Students will develop the ability to recognize and respect diverse communication styles thereby enhancing their effectiveness in global and multicultural settings.
