SUMMARY:

PG & Research Department of Microbiology organised a two days workshop for the UG Students on the Topic "**CRITICAL THINKING"** on **22.02.2023 & 23.02.2023.** Critical thinking is the universal intellectual values that transcend subject matter divisions: clarity, accuracy, precision, consistency, relevance, sound evidence, good reasons, depth, breadth, and fairness. EVENT REPORT - NUMERACY SKILLS

Department of B.COM (Computer Application):

DATE / EVENT	TOPIC	RESOURCE PERSON NAME	STUDENTS BENEFITTED
Sep 26, 2022 to Sep 28, 2022	NUMERACY SKILLS	Dr. S.PRIYANKA, Asst. Professor, Department of English, Asan Memorial College of Arts and Science, Chennai.	121

SUMMARY:

Department of B. Com Computer Application has conducted by a three days seminar on **NUMERACY SKILLS** from 26th Sept 2022 to 28th Sept 2022 at our college. Resource person Dr. S. PRIYANKA, Assistance Professor, Department of English, Asan Memorial College of Arts And Science, Chennai.

OBJECTIVE OF THE SEMINAR

Learning activities presented draw upon the conceptual framework of Goos, Geiger, and Dole (2014; also discussed in Goos, Geiger, Dole, Forgasz, and Bennison, 2019). In this framework, numeracy is conceptualised as comprising four elements and an orientation:

Element 1: Attention to real-life contexts (citizenship, work, and personal and social life).

Element 2: Application of mathematical knowledge (problem solving, estimation, concepts, and skills).

Element 3: Use of tools (representational, physical, and digital).

Element 4: The promotion of positive dispositions towards the use of mathematics to solve problems encountered in day-to-day life (confidence, flexibility, initiative, and risk).

Orientation: A critical orientation to interpreting mathematical results and making evidence-based judgements.

The resources highlight what numeracy is with respect to each learning area, and outline why it is important to develop students' numeracy capabilities within the learning area. Guidance is provided for teachers on the following:

- How to embed numeracy in their learning area.
- How to assess numeracy learning.
- How to deal with challenges and dilemmas using strategies recommended by experts.

The activities are described in terms of subject-specific learning intentions and content descriptors. The numeracy content and skills are highlighted and explained, with particular focus on how the numeracy links enhance the learning area's specific concepts. Direct links to the Victorian Curriculum: Mathematics highlights the connections between the activity and the students' previously developed mathematical skills and understandings.

PG & RESEARCH DEPARTMENT OF MICROBIOLOGY

DATE /EVENT	TOPIC	RESOURCE PERSON NAME	STUDENTS BENEFITTED
19th & 20st Sep 2022	ENHANCING EMOTIONAL INTELLIGENCEOF STUDENTS - TWO DAYS WORKSHOP	MR.R.MOHAMMED SHAKEEL Software Engineer Dyooti, Chennai	254

SUMMARY:

PG & Research Department of Microbiology organised a two day workshop for the UG Students on the Topic "**Enhancing Emotional Intelligence of Students"** on **19.09.2022 & 20.09.2022.** Emotional intelligence refers to a person's ability to perceive, control, evaluate, and express emotions. Emotional intelligence is centered on abilities such as identifying emotions, evaluating how others feel, controlling one's own emotions, perceiving how others feel, using emotions to facilitate social communication and relating to others. Emotional intelligence helps one build stronger relationships, succeed at work or college, and achieve one's career and personal goals, as well as reduce group stress, defuse conflict, and enhance job satisfaction. It can also help connect with one's inner feelings, turn purpose into action, and make informed decisions about what matters most to oneself. During these times, it is essential to remember to practice kindness, and being in touch with our emotions can help us do just that.Total of 150 Students participated in the Seminar.

Learning Outcome:

Students were able to

- Learn to create the ability to perceive emotions in oneself and others accurately.
- Create the ability to use emotions to facilitate thinking.
- Understand emotions, emotional language, and the signals conveyed by emotions so as to attain specific goals.
